Veterinary Use Only

FOR USE IN CATS ONLY

Recommended to help support proper digestion and bowel health.

DiaGel is an oral one-time use syringe, used to maintain a healthy intestinal tract and may be given when diarrhea occurs.

Causes of diarrhea may include:

- Diet and/or water changes
- Environment changes
- Indiscretions in diet
- Stress

Pre-Stress Use: **DiaGel** may be given 2 hours prior to stress-induced events (boarding, hunting, racing, breeding, traveling, and showing) to help reduce the incidence of a digestive disruption.

Directions for use:

Remove the syringe tip cap. Place the syringe between the side teeth of the cat, aiming as far down on the back of the tongue as possible. Gently push the plunger to release the gel. Discard any unused portion of the gel and syringe after use.

Primary Use: Give a 1 ml syringe per cat at time of digestive disruption. A second 1 ml syringe may be given if necessary.

Pre-Stress Use: Give a 1 ml syringe 2 hours prior to stress induced event. Repeat as necessary.

Warnings:

For animal use only. Keep out of the reach of children and animals. In case of accidental overdose, contact a health professional immediately.

Storage:

Store in a cool, dry place protected from light.
